

Experimental architect
Gorm Christian Walmar

Profile

As a recent M.A. in Architecture (Cand. arch.) graduate from the Aarhus School of Architecture, I combine my academic background with practical experience from MAST - Maritime Architecture Studio and Icelandic Arkis Arkitektar.

I have a strong architectural passion for smaller-scale projects—with a special focus on furniture design, experiential architecture, and experimental pavilions. My key strength lies in the synergy between the digital and physical realms: I work at a high level in Rhino 3D, the Adobe Creative Cloud, and digital fabrication tools, complemented by strong skills in physical model making and full-scale construction.
